STEEL PLANTER

Steelish Planter Collection

Create a steelish interior with this beautiful planter. Steelish is a heavy planter made of 5mm thick steel – a durable purchase that you can enjoy for a long time. The graphic cubic form has a modern and minimalist appearance, and combines beautifully with organic green for a natural finishing touch.

WE DESIGN FIRE

The Sunwood® Brand Story

Our brand Sunwood was founded in 2009 by Carino and Wout Sunderman, father and son.

After 40 years of producing and developing indoor gas fires, and being in business with hospitality entrepreneurs like you, demands changed and we decided to head into a new direction: the outdoors. It became our mission to create an atmospheric terrace experience for restaurant guests, even while the weather's chilly. This is when we designed and developed the Marino, our very first and successful patio fire. Meanwhile sales have expanded to Europe and the Middle East, and we are working hard on expanding our range with new products.
